

Voice-Over Scripts

30 Scripts for Recording Day

Christine — these 30 scripts are pulled directly from the themes, devotionals, and language of BEHOLD! Each one is written in your voice, ready to read on camera or into a mic. They cover website promos, social media clips, devotional teasers, and webinar introductions.

BOOK CORE | DEVOTIONAL | FAITH & SCIENCE | WEBINAR TEASER | SOCIAL / SHORT

Tips for Recording

Read each script naturally — like you're talking to a friend, not performing. Pause where the dashes are. Let the wonder in your voice come through. We'll handle music, graphics, and editing around your voice.

Prepared for Christine Beltz | Be Captivated Books | The Vantage Media

Book Core Messages

01
BOOK CORE

Every detail of creation is a reflection of the Creator's character, design, and love. When we truly behold the world around us — we encounter the hand that made it all. That's what BEHOLD is about. Not just reading about God's creation — but learning to see it. Really see it. With both your scientific mind and your faithful heart.

USE: Website hero / main book trailer | 25-30 sec

02
BOOK CORE

I spent over twenty-five years standing in front of classrooms full of curious, question-asking students — with a textbook in one hand and a Bible in the other. And I watched their faces light up when they realized something remarkable: science and faith aren't enemies. They're dance partners in the same grand cosmic narrative. That's the story I wrote BEHOLD to tell.

USE: About the author / book promo | 25-30 sec

03
BOOK CORE

BEHOLD — Captivated by the God of Creation — is a study devotional with twenty chapters, each one taking a real scientific concept and showing you how it reveals the character of God. From the chemistry of solutions to the journey of the salmon — from the science of sleep to the forces that hold the universe together. This isn't textbook faith. This is wonder.

USE: Book overview / product page | 25-30 sec

04
BOOK CORE

I was fourteen when I first felt the tension. My biology teacher explained photosynthesis — this elegant chain of chemical reactions. And my youth pastor spoke about how God made the plants for us. I thought I had to choose. It took me years to understand — they were asking different questions entirely. Biology answers the how. Scripture answers the why. And when you study both seriously — they illuminate each other with stunning clarity.

USE: Origin story / blog promo / social media | 30-35 sec

05
BOOK CORE

I wrote BEHOLD for the person sitting in a pew wondering if they're allowed to love science. For the student who thinks faith means turning off their brain. For the parent who doesn't know how to answer their child's questions about the natural world. You don't have to choose between wonder and worship. They were always meant to go together.

USE: Book trailer / social ad / homepage | 25-30 sec

06
BOOK CORE

The created world is God's signature — visible to anyone willing to look closely. The Apostle Paul wrote about this: 'God's invisible qualities — his eternal power and divine nature — have been clearly seen, being understood from what has been made.' That's not just theology. That's an invitation. To look. To study. To behold.

USE: Scripture-centered promo / devotional intro | 20-25 sec

Devotional Teasers

07
DEVOTIONAL

What does it mean to behold? It's more than seeing. More than glancing. To behold is to stop — to give something your full, unhurried attention — and let it change you. That's what God is asking when He says 'Be still and know.' Not just know about Him. Know Him. Through what He's made.

USE: Study 1 teaser / devotional intro | 20-25 sec

08
DEVOTIONAL

Did you know your body takes twenty thousand breaths a day? Twenty thousand — and you don't even think about it. Each one is a gift. Each inhale, a provision. The God who set that rhythm in motion — He's the Breath-Giver. And He hasn't stopped giving since the moment He breathed life into the first human being.

USE: Study 10 teaser: The Breath-Giver | 20-25 sec

09
DEVOTIONAL

Every fall, salmon abandon the comfort of the ocean and swim upstream — against rushing waterfalls, past predators, through exhaustion — back to the exact stream where they were born. They sacrifice everything to get home. The Christian life is the same journey. We are called to swim upstream. Not because it's easy — but because home is upstream. And the destination is worth everything.

USE: Study 14 teaser: God of the Journey | 25-30 sec

10
DEVOTIONAL

Metallurgy teaches us that to purify gold, you have to apply heat. Intense heat. The impurities rise to the surface and are skimmed away. What's left is pure, beautiful, valuable. God does the same thing with us. The pressure you're feeling? The fire you're walking through? He's not punishing you. He's refining you.

USE: Study 13 teaser: The Refiner | 20-25 sec

11
DEVOTIONAL

Your immune system is an army. White blood cells patrolling your body, learning to recognize invaders, remembering battles from years ago so they can protect you again. It's extraordinary. And it's a picture — of how God equips you for spiritual battle too. You were never meant to face this world unprotected. He's already built the armor into you.

USE: Study 12 teaser: Equipped for Battle | 25-30 sec

12
DEVOTIONAL

Why does ice melt? Why do rooms always get messy? It's the second law of thermodynamics — entropy. Everything in the universe naturally moves toward disorder. But God — God is the force of order. He reaches into our chaos and restores. He brings beauty from brokenness. Order from confusion. Life from death.

USE: Study 3 teaser: The God of Order | 20-25 sec

13
DEVOTIONAL

Gravity. Magnetism. Molecular attraction. The universe is held together by invisible forces — things you can't see but absolutely depend on. And every one of them is a picture of the God who draws all things to Himself. He is the force you can't see — but you feel. Pulling you closer. Always pulling you closer.

USE: Study 18 teaser: God Who Draws Us Near | 20-25 sec

14
DEVOTIONAL

Have you ever noticed how a single smell can unlock a memory you forgot you had? That's God's design. Your senses are gateways — to wonder, to gratitude, to worship. The Psalmist said, 'Taste and see that the Lord is good.' Not think it. Not agree with it. Taste it. Experience it. With every sense He gave you.

USE: Studies 4 & 16 teaser: Taste and Aroma | 20-25 sec

Faith & Science Clips

15
FAITH & SCIENCE

People say science robbed them of their faith. They learned how the heart pumps blood — and lost the ability to believe in God. But what kind of God were they believing in before? A God so small that understanding His creation makes Him disappear? The God I know is not threatened by knowledge. He invites investigation.

USE: Blog 1 promo / social clip / website | 20-25 sec

16
FAITH & SCIENCE

Every discovery in science is a discovery about God's mind. Every time we understand a process in nature — photosynthesis, the carbon cycle, plate tectonics — we're reading pages of His autobiography. We're seeing how He thinks. What He values. Order. Beauty. Balance. Elegance.

USE: Website / social / blog promo | 15-20 sec

17
FAITH & SCIENCE

The human eye captures light and converts it to electrical signals that travel through the optic nerve. Your brain then reconstructs a three-dimensional image of the world around you — in milliseconds. You don't even think about it. You just see. How can you study that — and not stand in awe?

USE: Social clip / website / science wonder reel | 15-20 sec

18
FAITH & SCIENCE

If you've ever felt a conflict between faith and science — I want to invite you to walk toward that tension. Don't run from it. Study the creation. Read what Scripture says about it. Watch how they don't compete — how the hows of science make the whys of faith more beautiful.

USE: CTA / invitation / blog promo | 15-20 sec

19
FAITH & SCIENCE

God made a world layered with complexity, fractal patterns, and beauty at every scale — from the spiraling arms of galaxies to the double helix of DNA to the intricate symmetry of a snowflake. Why would He do that — unless He wanted us to explore, to discover, to wonder?

USE: Social clip / wonder montage | 15-20 sec

20
FAITH & SCIENCE

When you study the natural world deeply — really study it — you're practicing a spiritual discipline. You're learning to recognize the fingerprints of your Creator. You're training your heart to respond to revelation. Because that's what the created world is. Revelation.

USE: Devotional intro / social clip | 15-20 sec

Webinar Announcements

21 WEBINAR TEASER

What if you could teach your children to see God — not just in church on Sunday — but in every leaf, every sunset, every science experiment at the kitchen table? That's what Raising Wonder is all about. A new webinar series where I'll walk parents through practical ways to make creation the classroom and wonder the curriculum.

USE: Webinar 1 promo: Raising Wonder (parents) | 20-25 sec

22 WEBINAR TEASER

You don't need a lab coat to teach your kids about God through science. Cooking dinner. Walking through a park. Watching the stars. These are creation classrooms — and I'll show you how to use them. Raising Wonder — a new webinar series for parents. Coming soon.

USE: Webinar 1 short promo | 15-20 sec

23 WEBINAR TEASER

What if every science class pointed students back to the Creator? BEHOLD Science Lab is a brand-new webinar course — ten lessons where we explore real science — chemistry, biology, physics — and discover how every principle points back to the God who designed it all. For students who want to learn with wonder.

USE: Webinar 2 promo: BEHOLD Science Lab (students) | 20-25 sec

24 WEBINAR TEASER

After twenty-five years of teaching science — first at the college level, then in classrooms with teenagers — I've learned one thing: students don't just want facts. They want meaning. They want to know why it matters. That's what our new webinar series gives them. Real science. Real faith. Real wonder.

USE: Webinar 2 promo / credibility piece | 20-25 sec

25 WEBINAR TEASER

How do you answer your child when they say, 'But my teacher said there's no God'? How do you handle the dinosaur questions? The Big Bang conversation? In Raising Wonder, I'll give you the frameworks — age-appropriate, grace-filled, rooted in both science and Scripture — so you never have to feel caught off guard again.

USE: Webinar 1 pain-point promo | 20-25 sec

26
WEBINAR TEASER

I'm building something new — two webinar series that take everything in BEHOLD and bring it to life on screen. One for parents learning to teach their children. One for students learning directly from me. Pre-recorded, with Q-and-A, companion materials, and hands-on experiments. Stay tuned — something wonderful is coming.

USE: General webinar announcement / teaser | 20-25 sec

Social Media Shorts

27
SOCIAL / SHORT

Science doesn't threaten my faith. It deepens it. Every equation, every mechanism, every discovery — points back to the same conclusion: there is a God, and His creativity is boundless.

USE: Instagram / TikTok / short-form social | 10-12 sec

28
SOCIAL / SHORT

The struggle is part of the journey — not evidence that you're on the wrong path. Ask the salmon.

USE: Social media quote / reel hook | 6-8 sec

29
SOCIAL / SHORT

Two books. One Author. The book of nature and the book of faith — both written by the same God. Read them together. That's where wonder begins.

USE: Social quote / website / reel | 8-10 sec

30
SOCIAL / SHORT

You were designed to behold. Not to scroll past. Not to ignore. Not to rush. To stop — to look — and to let what you see change you. Start beholding. Start today.

USE: CTA reel / closing tagline / social | 10-12 sec

Recording tip: Don't worry about perfection. We can do multiple takes. The most important thing is that your warmth and passion come through. Just be you.
