

BEHOLD! Webinar Series

Two Pre-Recorded Courses to Extend Your Ministry

A detailed proposal for two webinar series built around your book, your 25+ years of science teaching experience, and the faith-and-creation message at the heart of BEHOLD!

Prepared for Christine Beltz | Be Captivated Books

The Vantage Media | 2026

The Opportunity

Christine, your book sits at a unique intersection: faith and science, wonder and education, creation and the Creator. But a book can only reach people in one format. Webinars let you take that same message and deliver it as an **experience** — visual, personal, and interactive.

With 25+ years in the classroom — first at the college level, then as a dedicated science teacher — you have something most authors don't: **the ability to teach**. That's the superpower here. These webinars turn your teaching gift into a scalable digital ministry that reaches families and students far beyond your local community.

Why Webinars Work for BEHOLD!

- **Pre-recorded = polished** — You film each session once, edit it to perfection, and it's available forever. No tech stress on launch day.
- **Q&A; keeps it personal** — Viewers submit questions as they watch. You can answer them in dedicated Q&A; episodes or a live follow-up session.
- **Two distinct audiences** — Parents need different content than students. Two series means each audience gets exactly what they need.
- **Revenue + reach** — Webinars can be offered free (to grow your audience), as paid courses (to generate income), or bundled with the book.
- **Evergreen content** — Unlike a live event, pre-recorded webinars work 24/7. A parent in Alaska can watch at midnight. A homeschool co-op in Georgia can use it as curriculum.

"Every detail of creation is a reflection of the Creator's character, design, and love."

WEBINAR SERIES 1

Raising Wonder

Teaching Your Children to See God in Science

AUDIENCE	**Christian parents, homeschool families, Sunday school leaders, small group facilitators**
FORMAT	**8 pre-recorded episodes (20-30 min each) + 2 bonus Q&A; episodes**
TOTAL RUNTIME	**Approximately 4-5 hours of content**
COMPANION MATERIALS	**Downloadable parent guide, activity sheets, discussion prompts, scripture cards**

Why This Series Matters

Most Christian parents feel caught between two worlds: they want their children to love science, but they worry about the secular framing that comes with it. Meanwhile, research shows that the #1 reason young adults leave their faith is an inability to reconcile science and belief. This series gives parents a third path — one where science doesn't compete with faith but **deepens it**.

With your background — over 25 years teaching science, both at the college level and in K-12 — you're uniquely qualified to show parents how to have these conversations at home. This isn't theory. It's practical, classroom-tested wisdom repackaged for the kitchen table.

Episode Guide

01

You Don't Need a Lab Coat

Why every parent is already a science teacher — and how everyday moments (cooking, gardening, walks) become creation lessons.

25 min | Science: Observation & inquiry | Faith: Psalm 19:1 — the heavens declare

02

The Wonder Habit

How to cultivate a 'behold' mindset in your family. Practical routines — nature journals, God Stop moments, sensory walks — that build faith through attention.

25 min | Science: Scientific observation | Faith: Beholding God (Study 1 from BEHOLD!)

03

When Your Kid Asks the Hard Questions

How to handle 'But my teacher said...' moments. Age-appropriate frameworks for dinosaurs, evolution, the Big Bang, and the age of the earth without fear or dismissal.

30 min | Science: Critical thinking & evidence | Faith: Faith and reason as allies

04

The Human Body: Fearfully and Wonderfully Made

Teaching kids to marvel at their own design — from the immune system (spiritual armor) to the miracle of breath. Directly tied to BEHOLD! Studies 10 and 12.

25 min | Science: Anatomy & physiology | Faith: Psalm 139:14 — God's design in us

05

Kitchen Table Chemistry

Simple experiments you can do at home that reveal God's order in creation. Solutions, mixtures, and reactions become lessons about the Church as one body.

20 min | Science: Chemistry basics | Faith: Unity in the body of Christ (Study 5)

06

Outside the Back Door

How to use your backyard, a park, or a nature trail as a creation classroom. Migration, seasons, animal behavior — all pointing to God's faithful design.

25 min | Science: Ecology & animal behavior | Faith: God of the Journey (Study 14)

07

Rest, Sleep, and Why God Designed the Off Switch

The science of sleep and stillness as a family conversation about trust, Sabbath, and God's design for renewal. A topic every busy family needs.

20 min | Science: Neuroscience of sleep | Faith: Selah and rest (Study 6)

08

Building a Family of Beholders

Putting it all together: a practical 30-day family plan, book recommendations, conversation starters, and how to keep the wonder alive long-term.

25 min | Science: Lifelong learning habits | Faith: Imitating Christ (Study 19)

Bonus Episodes

Q&A; Episode 1: Your Questions Answered — Christine responds to submitted viewer questions on the toughest faith-and-science parenting topics.

Q&A; Episode 2: Live Follow-Up Session — An optional live session where parents can join Christine for real-time conversation (recorded for replay).

Downloadable Companion Materials

- **Parent Guide (PDF)** — A beautifully designed guide with key takeaways, scripture references, and action steps for each episode
- **Activity Sheets** — Printable worksheets for each episode with hands-on experiments kids can do with parents

- **Discussion Prompts** — 40 conversation starters organized by age group (5-8, 9-12, 13+) tied to each episode's theme
- **Scripture Memory Cards** — Printable cards pairing each devotional topic with a key verse for families to memorize together
- **30-Day Family Wonder Challenge** — A daily calendar of small activities (nature walk, experiment, journaling) that families do together

WEBINAR SERIES 2

BEHOLD! Science Lab

A Creation Science Course for Young Explorers

AUDIENCE	**Students ages 10-18 (adaptable for homeschool, co-ops, church youth groups, Christian schools)**
FORMAT	**10 pre-recorded lessons (20-25 min each) + 2 bonus Q&A; episodes**
TOTAL RUNTIME	**Approximately 5-6 hours of content**
COMPANION MATERIALS	**Student workbook, lab experiment guides, reflection journal prompts, quiz questions**

Why This Series Matters

Students today are surrounded by science content — YouTube, TikTok, school — but almost none of it connects what they're learning to the God who designed it all. This series changes that. It takes real science (chemistry, biology, physics, ecology) and shows students — in Christine's warm, engaging teaching style — how every scientific principle points back to the Creator.

This isn't watered-down science or preachy religion. It's rigorous and wonder-filled. Christine's 25+ years of classroom experience means she knows how to hold a student's attention, ask the right questions, and make complex topics click. Each lesson ties directly to one or more of the 20 devotionals in BEHOLD!, making the book and the course work hand-in-hand.

Episode Guide

01

What Does It Mean to BEHOLD?

Introduction to the course — learning to see the world with both scientific and spiritual eyes. What 'behold' really means and why it matters.

20 min | Science: Scientific method & observation | Faith: Study 1: BEHOLD! God

02

Order From Chaos: Entropy and God's Design

Why does ice melt? Why do rooms get messy? The second law of thermodynamics — and why God is the ultimate force of order and restoration.

25 min | Science: Thermodynamics & entropy | Faith: Study 3: The God of Order

03

The Chemistry of Community

Solutions, mixtures, and compounds — how chemistry shows us what it means to become 'one body.' Hands-on experiment: making a solution and observing unity at the molecular level.

25 min | Science: Solution chemistry | Faith: Study 5: God of the Solution

04

Every Breath You Take

The respiratory system is mind-blowing — 20,000 breaths a day, each one a gift. How does oxygen exchange actually work, and what does it teach us about God's provision?

20 min | Science: Respiratory biology | Faith: Study 10: The Breath-Giver

05

Your Built-In Army

White blood cells, antibodies, T-cells — your immune system is a battlefield. Explore how God equipped you for battle, physically and spiritually.

25 min | Science: Immunology basics | Faith: Study 12: Equipped For Battle

06

The Incredible Journey of the Salmon

Thousands of miles through the ocean, back to the exact stream where they were born. The salmon's migration is a picture of the Christian journey. Prepare to be amazed.

25 min | Science: Marine biology & migration | Faith: Study 14: God of the Journey

07

Refined by Fire

How metallurgy works — heat, pressure, impurities burning away to reveal pure gold. And how God uses the same process in our lives.

20 min | Science: Metallurgy & materials science | Faith: Study 13: The Refiner

08

Forces That Pull Us Close

Gravity, magnetism, molecular attraction — the universe is held together by invisible forces. Discover the God who draws all things to Himself.

25 min | Science: Physics: forces & attraction | Faith: Study 18: God Who Draws Us Near

09

The Language of Taste and Smell

How do taste buds work? Why can a smell unlock a memory? The senses as a gateway to understanding 'taste and see that the Lord is good.'

20 min | Science: Neuroscience of the senses | Faith: Studies 4 & 16: Taste and Aroma

10

The God Who Fills All Things

Final lesson — from the smallest atom to the largest galaxy, God fills every space. Putting it all together: what it means to live as a 'beholder' of creation.

25 min | Science: Atomic structure & cosmology | Faith: Study 20: God Who Fills Us

Bonus Episodes

Q&A; Episode 1: Ask Christine Anything — Students submit questions during the course and Christine answers the best ones, covering everything from 'How old is the earth?' to 'Can a scientist believe in God?'

Q&A; Episode 2: The Science Fair Challenge — Christine introduces a creative project: design an experiment or presentation that connects a science concept to a faith truth. Best entries featured on the website.

Student Companion Materials

- **Student Workbook (PDF)** — Fill-in-the-blank notes, diagrams, key terms, and reflection questions for each lesson
- **Lab Experiment Guides** — 10 hands-on experiments (one per lesson) that students can do at home with household materials
- **Reflection Journal Prompts** — 'What did you behold today?' prompts encouraging students to connect science lessons to their daily life
- **Quiz Questions** — Optional quiz for each lesson (great for homeschool credit or youth group accountability)
- **Certificate of Completion** — A printable, branded certificate for students who complete all 10 lessons

How the Webinars Work

Both series are pre-recorded for quality and convenience, but designed to feel personal and interactive.

The Viewer Experience

1. **Sign Up**
   Viewers register on becaptivatedbooks.com (or a hosted platform). They receive a welcome email with login details and their companion materials.

2. **Watch at Their Own Pace**
   Episodes unlock on a schedule (one per week) or all at once — your choice. Each episode is 20-30 minutes, perfect for a lunch break or family evening.

3. **Submit Questions**
   A question box is available below each episode. Viewers type their questions as they watch. These are collected and curated for the Q&A; episodes.

4. **Download Materials**
   After each episode, viewers can download that lesson's activity sheet, discussion prompts, or workbook pages.

5. **Join the Conversation**
   An optional community space (Facebook group, email list, or forum) lets viewers discuss episodes, share their 'God Stop' moments, and connect with each other.

6. **Q&A; Episodes**
   After the main series, Christine records 1-2 Q&A; episodes answering the most popular submitted questions. For a premium experience, a live Q&A; session can be offered.

Platform Options

There are several excellent platforms for hosting pre-recorded webinars with Q&A.; Here are our top recommendations:

- **Teachable or Thinkific** — Best for a full course experience with lessons, quizzes, and certificates. Monthly fee, but you keep 100% of revenue.
- **eWebinar** — Purpose-built for pre-recorded webinars with live-feeling Q&A;, polls, and automated scheduling. Great for the 'event' feel.
- **Your Own Website** — Videos hosted on Vimeo (password-protected) and embedded on becaptivatedbooks.com with a simple question submission form. Most control, lowest cost.

- **YouTube (Private/Unlisted) + Membership** — Free hosting, gated by a membership signup. Simple but effective.

Production Overview

What Christine Needs to Do

- **Prepare talking points** — Not a full script. Christine teaches best when she's natural and conversational. Bullet-point outlines for each episode.
- **Film in a comfortable setting** — A warm, well-lit space that matches the book's feel. A home office with plants, natural light, and the book visible works perfectly.
- **Use simple visuals** — Slides with photos, diagrams, and scripture verses appear alongside Christine. We handle the design.
- **Record Q&A; responses** — After viewer questions come in, Christine records casual, personal responses.

What We Handle

- Video editing, graphics, and intro/outro branding
- Companion material design (PDF guides, workbooks, cards)
- Platform setup and episode uploads
- Landing page design on becaptivatedbooks.com
- Email sequence for registrants (welcome, episode reminders, follow-up)
- Question collection and curation system

Revenue & Distribution Models

Webinars are one of the most flexible revenue tools for authors. Here are four models — you can start with one and evolve over time.

Free (Audience Growth)

Offer the series free to maximize reach. Revenue comes indirectly — book sales, speaking invitations, email list growth, and establishing authority. Best for launch phase.

Paid Course ($29-$79)

Charge per series or bundle both for a discount. Includes all companion materials. Platforms like Teachable handle payments automatically. Predictable, passive income.

Book Bundle ($49-$99)

Package the webinar series with a signed copy of BEHOLD! and the companion materials. Increases book sales and perceived value. Great for holiday or gift seasons.

Church/Group License ($149-$299)

Sell a group license for churches, homeschool co-ops, or small groups to use the series as curriculum. Includes permission for group viewing and discussion guide.

Suggested Timeline

MONTH 1-2	**Planning & Preparation** Finalize episode outlines, prepare talking points, design companion materials, set up filming space and equipment.
MONTH 2-3	**Filming** Record all episodes for Series 1 (Raising Wonder — for parents). 1-2 episodes per filming session.
MONTH 3-4	**Post-Production** Video editing, graphics, branding, companion material finalization. Landing page built on becaptivatedbooks.com.
MONTH 4	**Series 1 Launch** Release 'Raising Wonder' with email campaign, social media promotion, and early-bird pricing.
MONTH 4-5	**Film Series 2** Record all episodes for 'BEHOLD! Science Lab' (for students). Collect Q&A; questions from Series 1 viewers.
MONTH 5-6	**Series 2 Launch + Q&A;** Release student series. Record and release Q&A; bonus episodes for both series.

Next Steps

This proposal is a starting point. Here's how we move forward:

1. Review this document — Take your time. Mark anything you love, anything you'd change, or any topics you'd add or swap.

2. Pick your starting series — We recommend launching 'Raising Wonder' (parents) first, since it creates demand for the student series.

3. Choose your model — Free for growth, paid for revenue, or bundled with the book? We can start one way and adjust.

4. Schedule a planning session — We'll walk through episode outlines together, set up the filming plan, and lock in the timeline.

"When we truly behold the world around us, we encounter the hand that made it all."
